

Patent
application of
Todd D.Gordon
For
Gear Shifters Scuff Protector

Background...field of Invention.

This invention will prevent scuffing of shoes on motor vehicle foot- gear shifters.

Specifically a protection designed for shoes worn by all riders of motor vehicles with gear shifters.

Background....Description of prior art.

Originally a motor cycle gear shifter is made of metal surrounded by hard rubber.

Summary:

The essence of this invention...The metal gear shifting device totally covered with a soft material

prevents any damage to the riders shoes.

No longer would the rider need to excessively shine, polish, or repair their shoes.

Saves time and money.

Further objectives and advantages of my invention will become apparent from a consideration of the

drawings and ensuing description.

Description of drawing continued.

The metal foot shifter is totally covered in soft material.

Conclusion, Ramification and scope of invention.

This is concerning outfit of invention and can achieve cause.

It is totally user fiendly.

The invention scope is simply to protect shoes of the riders.
